SERIES OVERVIEW

Leadership and Culture

Setting the stage for the rest of the training series, we will examine some of the foundational understandings and insights that are used by exceptional leaders to win the war on talent and achieve lasting business success.

Recruitment and Selection

All companies want to be populated by employees who combine great talent with outstanding character traits and to then place those individuals in positions where they can excel. MindSet's recruiting insights and easy-to-remember diagnostic tools will help you achieve this crucial goal.

Building Stars

Star employees are created by outstanding leaders who know how to use the power and influence inherent in their position to develop an otherwise ordinary employee. MindSet will show you how supervisors can better accomplish this most exciting and rewarding aspect of leadership.

Instilling Pride and Ownership

Great companies are populated by employees who have a deep sense of pride and ownership in their company. Such employees will demonstrate loyalty, and the quality and quantity of their work production will be outstanding. This section reviews specific techniques that you can use to infuse staff members with a greater sense of personal investment.

Compensation

The fundamental nature of the relationship between an employer and employee is an exchange, i.e., the employee's labor and expertise in return for monetary compensation from the employer. The nature and process of this exchange is one of the most powerful tools an employer holds for shaping employee behavior and attitude. MindSet will cover both theory and concrete examples of different approaches to compensation that have been shown to positively impact employee satisfaction and loyalty, as well as the organization's overall cultural health.

Team Chemistry

Even the best teams will occasionally become dysfunctional for a variety of reasons, and they seldom right themselves without the intervention of competent and purposeful leadership. The MindSets in this section provide insights and specific techniques that can be used to diagnose and treat lousy team chemistry.

Decision Making

Few things are more basic to business success than responsive and capable decision making. This section of the MindSet Leadership Series will teach you potent decision-making techniques and processes that leaders use to generate first-rate conclusions, as well as some of the more common decision making pitfalls that lead to poor outcomes.

Mastering Conflict

Leadership often brings with it the challenge of managing conflict, and for many this constitutes their single greatest source of stomach acid and professional disaffection. MindSet will review insights that will help leaders from throughout your system to be better able to accurately diagnose and effectively (and sometimes proactively!) manage a variety of conflict situations.

Dealing with Problem Employees

Almost every company has a noticeable bottom 10% – those employees who contribute little to its success while making life miserable for leaders and colleagues alike. Competent leaders must possess the knowledge to identify, engage, control, improve, and (if necessary) remove these employees. MindSet will explain many useful insights and techniques that outstanding leaders use to effectively deal with these cultural poisons.

ATTRACT, BUILD, MOTIVATE, AND RETAIN GREAT PEOPLE

"The MindSet Leadership Series is the one leadership training program that I have ever gone through that I thought had real value. MindSet did not just focus on management tricks to squeeze more out of my team, but on making me into a better person and helping my team members to be better people."

- Bradly Burgess

Chief Technology Officer,
Orion Advisor Services LLC

"MindSet is packed with information and insights that make leaders better able to build culture and accelerate business success!"

- Stephanie Hand, SPHR

Human Resource
Director, Lutz

"The MindSet Leadership Series is the best leadership course I have ever attended. I use the MindSet strategies and techniques on a regular basis. They are easy to put into practice, yet highly effective."

- Jessica Koch

Human Resources Manager,
Fusion Medical Staffing

"QLI is proud to claim the distinction of being the home of MindSet leadership, and we still today relentlessly reinforce MindSet concepts and techniques with all of our leaders. As a result, the MindSet approach is deeply embedded into our culture, and it is responsible for much of our growth, cultural health, and business success. I would strongly encourage any CEO or owner to get your executives and supervisors trained as MindSet Leaders."

- Patricia Kearns

President and CEO,
QLI

"When it comes to leadership and how to build a great work culture, MindSet is a resource that I can unconditionally recommend. Their approach flat-out works."

- Susan Courtney
